Interview Analysis Report

Interview Opinion

The restaurant manager believes that the current system needs improvement. A computerized system will make restaurant operations easier and faster.

Interview Feelings

Employees feel that manual work is tiring and time-consuming. They want a system that reduces mistakes and makes their work easier.

Current State of the System

- Orders are recorded manually.

- Bills are calculated manually.

- Inventory is checked manually.

- Customer reservations are handled by phone.

- Errors and delays sometimes occur.

System Goals

1. Manage customer orders efficiently.
2. Reduce human errors.
3. Generate bills automatically.
4. Manage food inventory.
5. Improve customer service.
6. Manage reservations.
7. Save time and effort.
8. Generate daily sales reports.
